Spring & Summer 2011/12

Hurray! Winter has gone and we have the beauty of spring to look forward to, followed by the lazy days of summer.

Take the time to check through your wardrobe for the start of the new season. Bring out your spring/summer clothes and find out what needs to be replaced. Make sure your autumn/winter clothes are cleaned and ready for storage.

Once you have everything in order it is time to update for the seasons latest look. Colour is the first thing to look for. This season we will see lots of bold colour such as

orange, mandarin, raspberry, teal, jade, cobalt blue, purple and violet. Mix prints or bold stripes with plain, block colour for a modern look.

September Special Offer

As we age, our colouring changes and we can no longer wear the same intensity as we did when we were younger, so check out your colour swatch and find out if it needs updating. For the month of September, I am offering a colour consultation for \$199, so why not take advantage of this special offer and have your colours re-done.

Don't forget, we can all wear all colours, it is the tone and intensity which differs from person to person, so make sure you are aware which tone best suits you.

Flattering fitted styles are widespread this season, along with cropped, slim fitting, pants, full skirts and sundresses. The extended shoulders and shoulder decoration which we have seen for the last couple of seasons are still in this season. Chunky jewellery will finish your look.

CREDIT CARD FACILITIES

If you want to place an order for anything in my range of products just pick up the telephone, or email me at ls@sgml.net.au tell me what you would like and give me your credit card details. Your order can then be mailed out to you, delivered or picked up by you at a time to suit.

Guest Speaker

Do you belong to a group which needs guest speakers? If so I would be happy to come along and share some colour and image tips with you. Give me a call to find out more.

BREAKING NEWS!

WOULD YOU LIKE TO LIVE A LONG AND HEALTHY LIFE?

Scientists have found the ticking biological “clock”: telomeres. When a cell’s telomeres get too short, its chromosomes become unstable, and chromosome rearrangements and mutations occur. This causes the cell to become less healthy and eventually unable to divide, which in turn can lead to diminished health.

Product B has a complex blend of 28 botanicals and minerals and offers the best telomere support on the market when used in combination with a system to support better health. If you would like more information on this, please call or email me.
